## **DETAILED ACTION**

### ***Claim Objections***

Claim 1 is objected to because of the following informalities: on the last line of claim 1, it is suggested that “at least one” be inserted after the second occurrence of “the” to maintain consistency with the earlier recitation of “at least one opening” on line 3. Appropriate correction is required.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent no. 5,350,130 to Hitomi et al.

Neufeld, as seen in Figure 2 for example, discloses a spinning reel, comprising: a reel body 2 having an axle hole (unnumbered), a transverse hole (unnumbered) and at least one opening 2C, wherein the reel body 2 has a connection portion (unnumbered); a drive mechanism (6, 7, 8, 9, 10, 11) mounted inside the reel body 2 and having an input portion 6 and an output portion 13, the drive mechanism comprising a gear and a guiding device has at least a portion thereof received in the opening 2C; a handle 1 coupled with the input portion 6 of the drive mechanism; a rotor 4 coupled with the output 14 portion of the drive mechanism; a spool 5

coupled with the output portion 13 of the drive mechanism; a cover 16 mounted on the reel body to shield the opening.
